EXAMINATIONS BY PSI SERVICES LLC

This Candidate Information Bulletin provides you with information about the examination and application process for becoming licensed as a Residential Wireman, Journeyman Wireman and/or Master Electrician in the State of Colorado, or to meet the requirements of Colorado law for apprentices with six or more years of apprentice registration.

The licensing examinations for Residential Wireman, Journeyman, and Master Electrician, and 6-Year apprentices, reference the 2023 edition of the NEC Code Book and test entry-level competence in the several areas in which licensees are legally allowed to practice. The licensing examinations require candidates to demonstrate their qualifications in relation to a variety of job task areas and settings. Since the electrical licensing examinations are not tailored to the specialty in which a particular candidate may practice or intend to practice, once licensed at a particular level (e.g., journeyman electrician), a person may freely choose to practice in any or all of the specialties permitted by the Colorado state electrical law.

The Board has contracted with PSI Services LLC (PSI) to conduct its examination program. PSI provides examinations through a network of computer examination centers in Colorado. PSI works closely with the State to be certain that examinations meet local as well as national requirements in basic principles and examination development standards.

Implementation of SB 21-077

On May 27, 2021, Governor Jared Polis signed [SB21-077 Remove Lawful Presence Verification Credentialing](#). The bill specifies that the verification of lawful presence is not required of an applicant for a license, certificate, or registration to practice a regulated profession, and removes such requirements from the Department of Education and the Department of Regulatory Agencies. The bill also authorizes applicants for licensure to utilize their Individual Taxpayer Identification Number (ITIN), or other forms of identification as authorized by each board or program by rule, in addition to a Social Security Number (SSN). The bill also clarifies that this exclusion is state law with regards to eligibility for state and local public benefits.

EXAMINATION CONTENT OUTLINE

NON-SCORED QUESTIONS

Your examination contains non-scored questions. The use of such questions is an essential step in developing accurate future examinations. These questions will NOT be scored and time to answer them has been added to the time allowed.

REFERENCE LIST

All examination questions are consistent with the 2023 National Electrical Code book. The 2023 National Electrical Code book and Formula Page will be provided to you at the test center. You may not write, highlight, underline, and/or index on the references. You may not use any other materials.

Also, review of electrical theory and common formulas is advised. Any of the several commonly used textbooks adopted by apprenticeship and community college training programs will be sufficient for this purpose. It is your responsibility to know and to be able to use basic electrical theory formulas since such knowledge may be required to work problems in the job task area of the examination entitled "H (Calculations)".

SCORING THE EXAMINATION

The RW, JW, and ME licensing examinations are scored using a "compensatory scoring model." The compensatory scoring model evaluates all responses the candidate provides across all scored (non-pre-test) items, allowing the candidate to compensate for weaknesses in some Job Task Areas when strengths in other Job Task Areas are demonstrated.

All scored items that are answered correctly receive 1 point each and all scored items that are answered incorrectly or are not answered receive 0 points each. The candidate's final performance is then compared to the pass standard derived for each form of the licensing examination and assessment. Pre-test items are not scored and are not counted in the determination of the candidate's or licensee's final performance.

For the original licensure examination, the candidate earns a "Pass" if his or her final performance meets or exceeds the minimum pass standard deemed essential for safe practice upon entry as a newly-licensed practitioner. The candidate "Fails" if his or her final performance does not satisfy the minimal competence required for entry-level safe practice.
